Looking for someone to run a CPR certification course for our office proved to be more tedious than expected. We run a busy physiotherapy practice in Toronto with a lot of therapists and staff who needed to be re-certified. Scheduling the course had become the biggest issue.

We chose Lionheart CPR to re-certify our workplace because they were able to schedule training around our busy and hectic schedule. Their time-conscious training insured that we minimized the time we needed to shut down our clinic from day-to-day operations and managed to maximize our time practicing and learning CPR skills.

Most importantly, Lionheart CPR made CPR training engaging and fun on a Saturday afternoon for our staff! We will definitely choose Lionheart CPR for any future certification needs and strongly recommend them to our colleagues and friends!
